SPEAKERS: Mike Davis, Vice President – Technical Development, INCOSE San Diego Chapter and Chief Systems Engineer (CSE), SPAWAR Headquarters

TOPIC: Cyber Security, what is it, what really matters?

This presentation will provide an awareness overview of the cyber threats, major aspects, various leadership perspectives and key elements to address. It will also cover recommended resources / links, best practices, and opportunities in cyber. An overview cyber perspective is offered on why you should: know about the risks, be concerned for how it may affect you, be knowledgeable and prepared, and make the best of it for your job, organization, and family.

ABOUT THE SPEAKER: Mike Davis has over 20 years experience in IT/IA technical and operational leadership positions in many diverse government and commercial programs/projects/venues. Currently, he is the warranted CSE for Navy large deck ships and aircraft C4I integration at SPAWAR Headquarters. He served several years as the SPAWAR Senior Information Assurance (IA) Technical Warrant. Mike is also serving as the San Diego ISSA Vice President and Technical Advisor for “The Security Networks” – both proactive security professional groups. Mike earned graduate degrees in Management and Electrical Engineering and has taught Program Management at the University of Phoenix, as well as being “DAWIA” qualified in Program Management and Systems Engineering. He is CISSP certified and currently earning a CISO certificate. Mike was successful in a wide variety of positions such as: installing and operating US Navy enterprise and overseas networks, managing new ship (SCN) IT/IA installations, enterprise afloat test director, and division head for information assurance/computer network defense security products. He is a retired Navy Engineering Duty Officer (technical and acquisition manager), having served on submarines, destroyers, and amphibious class ships.
